Printed in Great Britain

Contents of Volume 93

Number 1, 7 November 1981

BIRDI, K. S., Cell Adhesion on Solids and the Role of Surface Forces . 1

KOTHEKAR, V. and SRIVASTAVA, A. K., Biophysical Studies on Molecular Mechanism of Abortificient Action on Prostaglandins. I. The Study of Molecular Electrostatic Potential Distribution of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1 7

KOTHEKAR, V. and KAILASH, S., Biophysical Study of Molecular Mechanism of Abortificient Action of Prostaglandins. II. The Study of the Long and Short Range Interaction between Different Fragments of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1 25

BADGEROW, J. P. and HAINSWORTH, F. R., Energy Savings Through Formation Flight? A Re-examination of the Vee Formation . 41

RIPOLL, D., MARCHI, E. and BENEGAS, J., A New Approach to Microtubule Depolymerization 53

FUKSHANSKY, L., A Quantitative Study of Timing in Plant Photoperiodism 63

PORTELLI, C., The Asymmetry of Biological Molecules . . . 93

TREISMAN, M., Evolutionary Limits to the Frequency of Aggression between Related or Unrelated Conspecifics in Diploid Species with Simple Mendelian Inheritance 97

IWASA, Y., Role of Sex Ratio in the Evolution of Eusociality in Haplodiploid Social Insects 125

DUGGLEBY, R. G., A Paucity of Palindromes in ϕX174 . . . 143

SAVAGEAU, M. A. and LAPOINTE, D. S., Optimization of Kinetic Proofreading: A General Method for Derivation of the Constraint Relations and an Exploration of a Specific Case . . 157

SAVAGEAU, M. A., Accuracy of Proofreading with Zero Energy Cost 179

SESHADRI, M. S. and FRITZSCH, G., The Time Evolution of Sequential Wnzyme Reactions: A Singular Perturbation Approach . . 197

POHL, H. A., Cellular Spin Resonance 20

AHLGREN, J. D., On the Molecular Basis of Oncogenesis . . 21

KIRKWOOD, R. S. M. and LAWTON, J. H., Efficiency of Biomass Transfer and the Stability of Model Food-webs . . . 22

BULMER, M. G., Worler–Queen Conflict in Annual Social Hymenoptera 23

PHIPPS, M., Entropy and Community Pattern Analysis . . . 25

LETTER TO THE EDITOR

TAYLOR, M., Foraging Behaviour of Ants: A Correction . . 27

Number 2, 21 November 1981

FINERTY, M., The Homology of Collagens 27

HALLAM, T. G. and CLARK, C. E., Non-autonomous Logistic Equations as Models of Populations in a Deteriorating Environment . 30

MASSALDI, H. A., URRUTIA, G. and CERRELLA, E. G., Theoretical Basis for the Interpretation of Surface Permeability Data by a Transient Method 31

HEINRICH, R. and SONNTAG, I., Analysis of the Selection Equations for a Multivariable Population Model. Deterministic and Stochastic Solutions and Discussion of the Approach for Populations of Self-reproducing Biochemical Networks 32

BARD, J. B. L., A Model for Generating Aspects of Zebra and Other Mammalian Coat Patterns 36

CECCHINI, A. B. P., MELBIN, J. and NOORDERGRAAF, A., Set-point: Is It A Distinct Structural Entity in Biological Control? . . 38

GHOSH, R., On the Physiological Significance of Positive and Negative Co-operativity 39

WILLSON, M. F., Sex Expression in Fern Gametophytes: Some Evolutionary Possibilities 40

HOGEWEG, P. and HESPER, B., Two Predators and One Prey in a Patchy Environment: An Application of MICMAC Modelling . 41

GIBATANI, A., The Polar Co-ordinate Model for Pattern Regulation in Epimorphic Fields: A Critical Appraisal 433

MANNING, J. T., The "Survivor Effect" and the Evolution of Parthenogenesis and Self-fertilization 491

LETTER TO THE EDITOR

FERRIER, J. M., On a Boundary Condition of Extracellular Ion Transport 495

ERRATUM 497

Number 3, 7 December 1981

ENOS, B. E. and MCQUARRIE, D. A., The Effect of Discrete Charges on the Electrical Properties of Membranes. II 499

ORLOVE, M. J., A Model of the Sex Ratio in Flying Ants with an Unexpected Equilibrium and an Expected ESS 523

REINER, J. M., Population Distribution of Labelled DNA and the Effects of Cell Division 533

PHILLIS, Y. A., Time Limits in the Control of Pollution Systems . 541

WHITEHEAD, E. P., Conditions for the Various Types of Co-operativity Allowed by the Adair Equation and Their Relation with the Algebraic Character of Binding Polynomials 547

GADAG, V. G., First Passage Time for a Supercritical Galton–Watson Process Restricted to the Non-extinction Set 585

BARRETT, A. N., A Theoretical Explanation of Directional Hearing Characteristics in Amphibia 591

WEISS, S. D., MCNAMARA, P. D. and SEGAL, S., Uptake of Proline by Renal Brushborder Vesicles: A Mathematical Analysis . . 597

ARGOS, P., Protein Structural Models for Nucleic Acid Interactions . 609

HOLLIDAY, R. and KIRKWOOD, T. B. L., Predictions of the Somatic Mutation and Mortalization Theories of Cellular Ageing are Contrary to Experimental Observations 627

MACDONALD, N. and WATKINSON, A. R., Models of an Annual Plant Population with a Seedbank 643

SRIVASTAVA, S. K. and MISHRA, P. C., Phototautomerism of the G–C Base Pair of DNA 65

OBENDORF, P., A Rotating Myosin Filament Theory of Muscular Contraction 66

BIANCHI, N. O., Molecular Mechanisms of Production of Symmetrical and Asymmetrical Chromosome Exchanges 68

LETTER TO THE EDITOR

RAJKOWSKI, K. M. and CITTANOVA, N., Corrected Equations for the Calculation of Protein-ligand Binding Results from Fluorescence Polarization Data 69

Number 4, 21 December 1981

BADE, M. L. and STINSON, A., Chitin and Chitinase: A Kinetic Model 69

WELCH, G. R. and KELETI, T., On the "Cytosociology" of Enzyme Action *in vivo*: A Novel Thermodynamic Correlate of Biological Evolution 70

MERAJVER, S. D., SHERIDAN, J. P. and SIGUEL, E. N., Theory of the Conformational Order of Single Component Sphingomyelin Bilayers 73

GRAY, B. F., On the "Surface Law" and Basal Metabolic Rate . 75

CROWLEY, P. H., BENHAM, C. J., LENHART, S. M. and MORGAN, J. L., Peripheral Doublet Microtubules and Wave Generation in Eukaryotic Flagella 76

BAUMANN, G. and EASTON, G. S., Markov Process Characterization of a Single Membrane Gating Site 78

SCHROEDER, L. A., Consumer Growth Efficiencies: Their Limits and Relationships to Ecological Energetics 80

MATTSON, P. A. H., A New Hypothesis for Molecular Behaviour . 82

PLATT, T. and SILVERT, W., Ecology, Physiology, Allometry and Dimensionality 85

FORSDYKE, D. R., Are Introns In-series Error-detecting Sequences? 86

BUSBY, R. C. and TALLARIDA, R. J., On the Analysis of Straight Line Data in Pharmacology and Biochemistry 867

HAGAN, P. S. and COHEN, M. S., Diffusion-induced Morphogenesis in the Development of *Dictyostelium* 881

BREMER, H. and CHUANG, L., Cell Division After Inhibition of Chromosome Replication in *Escherichia coli* 909

LEWIS, J. W., On the Coevolution of Pathogen and Host: I. General Theory of Discrete Time Coevolution 927

LEWIS, J. W., On the Coevolution of Pathogen and Host: II. Selfing Hosts and Haploid Pathogens 953

VINNE, D., Unidirectional Fluxes and Blood Flow . . . 987

VIGLER, P. W., *Trans* Effects in Cell Membrane Transport . . 997

KUBA, K. and TAKESHITA, S., Simulation of Intracellular Ca^{2+} Oscillation in a Sympathetic Neurone 1009

SHIRAZI, M. A. and RILEY, R. T., Estimation of Molecular Diffusivity in Isolated Animal Tissues 1033

LETTER TO THE EDITOR

VAN ZOELEN, E. J. J., VAN DER SAAG, P. T. and DE LAAT, S. W., Sources of Variation in Intermitotic Time and Their Relation to Cell Cycle Kinetics 1037

Index to Volume 93

Abortificient action of prostaglandins, biophysical studies on molecular mechanisms of; the study of the long and short range interaction between different fragments of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1, 25

Abortificient action of prostaglandins, biophysical studies on molecular mechanisms of; the study of molecular electrostatic potential distribution of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1, 7

Adair equation, conditions for the various types of co-operativity allowed by, and their relation with the algebraic character of binding polynomials, 547

Adhesion of cells on solids and the role of surface forces, 1

Ageing, cellular, predictions of the somatic mutation and mortalization theories are contrary to experimental observations, 627

Aggression between related or unrelated conspecifics in diploid species with simple Mendelian inheritance, evolutionary limits to the frequency of, 97

AHLGREN, J. D., On the molecular basis of oncogenesis, 215

Allometry, dimensionality, ecology and physiology, 855

Amphibia, a theoretical explanation of directional hearing characteristics in, 591

Animal tissues, isolated, estimation of molecular diffusivity in, 1033

Annual plant population with a seedbank, models of, 643

Annual social hymenoptera, worker–queen conflict in, 239

Ants, flying, with an unexpected equilibrium and an expected ESS, a model of the sex ratio in, 523

Ants, foraging behaviour of; a correction (letter), 275

ARGOS, P., Protein structural models for nucleic acid interactions, 609

Asymmetry of biological molecules, 93

BADE, M. L. and STINSON, A., Chitin and chitinase: a kinetic model, 697

BADGEROW, J. P. and HAINSWORTH, F. R., Energy savings through formation flight? A re-examination of the vee formation, 41

BARD, J. B. L., A model for generating aspects of zebra and other mammalian coat patterns, 363

BARRETT, A. N., A theoretical explanation of directional hearing characteristics in amphibia, 591

Basal metabolic rate and "surface law", 757

BAUMANN, G. and EASTON, G. S., Markov process characterization of a single membrane gating site, 785

BENEGAS, J. (see RIPOLL, D.), 53

BENHAM, C. J. (see CROWLEY, P. H.), 769

BIANCHI, N. O., Molecular mechanisms of production of symmetrical and asymmetrical chromosome exchanges, 681

Binding polynomials, conditions for the various types of co-operativity allowed by the Adair equation and their relation with the algebraic character of, 547

Biochemistry and pharmacology, the analysis of straight line data in, 867

Biological control, is set-point a distinct structural entity in?, 387

Biological molecules, the asymmetry of, 93
Biomass transfer efficiency and the stability of model food-webs, 225
Biophysical studies on molecular mechanism of abortificient action of prostaglandins: the study of the long and short range interaction between different fragments of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1, 25
Biophysical studies on molecular mechanism of abortificient action of prostaglandins: the study of molecular electrostatic potential distribution of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1, 7
BIRDI, K. S., Cell adhesion on solids and the role of surface forces, 1
Blood flow and unidirectional fluxes, 987
Boundary condition of extracellular ion transport (letter), 495
BREMER, H. and CHUANG, L., Cell division after inhibition of chromosome replication in *Escherichia coli*, 909
Brushborder vesicles, renal, uptake of proline by; a mathematical analysis, 597
BULMER, M. G., Worker–queen conflict in annual social hymenoptera, 239
BUSBY, R. C. and TALLARIDA, R. J., On the analysis of straight line data in pharmacology and biochemistry, 867

Ca^{2+} oscillation, intracellular, in a sympathetic neurone, simulation of, 1009
CECCHINI, A. B. P., MELBIN, J. and NOORDERGRAAF, A., Set-point: is it a distinct structural entity in biological control?, 387
Cell adhesion on solids and the role of surface forces, 1
Cell cycle kinetics, sources of variation in intermitotic time and their relation to (letter), 1037
Cell division after inhibition of chromosome replication in *Escherichia coli*, 909
Cell division, population distribution of labelled DNA and the effects of, 533
Cell membrane transport, *trans* effects in, 997
Cellular ageing, predictions of the somatic mutation and mortalization theories are contrary to experimental observations, 627
Cellular spin resonance, 207
CERRELLA, E. G. (see MASSALDI, H. A.), 313
Charges, discrete, effect on the electrical properties of membranes, 499
Chitin and chitinase: a kinetic model, 697
Chromosome exchanges, symmetrical and asymmetrical, molecular mechanisms of production of, 681
Chromosome replication in *Escherichia coli*, cell division after inhibition of, 909
CHUANG, L. (see BREMER, H.), 909
CITTANOVA, N. (see RAJKOWSKI, K. M.), 691
CLARK, C. E. (see HALLAM, T. G.), 303
Coat patterns, mammalian, a model for generating aspects of zebra and other, 363
Coevolution of pathogen and host: general theory of discrete time coevolution, 927
Coevolution of pathogen and host: selfing hosts and haploid pathogens, 953
COHEN, M. S. (see HAGAN, P. S.), 881
Collagens, the homology of, 279
Community pattern analysis and entropy, 253
Conformational order of single component sphingomyelin bilayers, theory of, 737
Consumer growth efficiencies: their limits and relationships to ecological energetics, 805

Co-operativity, conditions for the various types allowed by the Adair equation and their relation with the algebraic character of binding polynomials, 547
Co-operativity, positive and negative, on the physiological significance of, 395
CROWLEY, P. H., BENHAM, C. J., LENHART, S. M. and MORGAN, J. L. Peripheral doublet microtubules and wave generation in eukaryotic flagella, 769
Cycle kinetics, cell, sources of variation in intermitotic time and their relation to (letter), 1037
"Cytosociology" of enzyme action *in vivo*: a novel thermodynamic correlate of biological evolution, 701

DE LAAT, S. W. (see VAN ZOELEN, E. J. J.), 1037
Depolymerization, microtubule, a new approach to, 53
Development of dictyostelium, diffusion-induced morphogenesis in, 881
Dictyostelium, diffusion-induced morphogenesis in the development of, 881
Diffusion-induced morphogenesis in the development of dictyostelium, 881
Diffusivity, molecular, in isolated animal tissues, estimation of, 1033
Dimensionality, ecology, physiology and allometry, 855
Diploid species with simple Mendelian inheritance, evolutionary limits to the frequency of aggression between related or unrelated conspecifics in, 97
DNA, labelled, population distribution of, and the effects of cell division, 533
DNA, phototautomerism of the G–C base pair of, 655
DUGGLEBY, R. G., A paucity of palindromes in ϕX174, 143

EASTON, G. S. (see BAUMANN, G.), 785
Ecological energetics, limits and relationships of consumer growth efficiencies to, 805
Ecology, physiology, allometry and dimensionality, 855
Electrical properties of membranes, the effect of discrete charges on, 499
Electrostatic potential distribution of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1; biophysical studies on molecular mechanism of abortificient action of prostaglandins, 7
Energetics, ecological, limits and relationships of consumer growth efficiencies to, 805
Energy cost, zero, accuracy of proofreading with, 179
Energy savings through formation flight? A re-examination of the vee formation, 41
ENOS, B. E. and MCQUARRIE, D. A., The effect of discrete charges on the electrical properties of membranes. II, 499
Entropy and community pattern analysis, 253
Environment, deteriorating, non-autonomous logistic equations as models of populations in a, 303
Environment, patchy, two predators and one prey in a; an application of MICMAC modelling, 411
Enzyme action *in vivo*, on the "cytosociology" of; a novel thermodynamic correlate of biological evolution, 701
Enzyme reactions, sequential, the time evolution of; a singular perturbation approach, 197
Epimorphic fields, the polar co-ordinate model for pattern regulation in; a critical appraisal, 433
Error-detecting sequences, in-series, is this what introns are?, 861
Escherichia coli, cell division after inhibition of chromosome replication in, 909

Eukaryotic flagella, peripheral doublet microtubules and wave generation in, 769
Eusociality in haplodiploid social insects, role of sex ratio in the evolution of, 125
Evolution, biological, a novel thermodynamic correlate of; on the "cytosociology" of enzyme action *in vivo*, 701
Evolution of eusociality in haplodiploid social insects, role of sex ratio in, 125
Evolution of parthenogenesis and self-fertilization, and the "survivor effect", 491
Evolution and sex expression in fern gametophytes, 403
Evolution, time, of sequential enzyme reactions: a singular perturbation approach, 197
Evolutionary limits to the frequency of aggression between related or unrelated conspecifics in diploid species with simple Mendelian inheritance, 97
Extracellular ion transport, on a boundary condition of (letter), 495

Fern gametophytes, sex expression in; some evolutionary possibilities, 403
FERRIER, J. M., On a boundary condition of extracellular ion transport (letter), 495
FINERTY, M., The homology of collagens, 279
First passage time for a supercritical Galton–Watson process restricted to the non-extinction set, 585
Flagella, eukaryotic, peripheral doublet microtubules and wave generation in, 769
Fluorescence polarization data, corrected equations for the calculation of protein-ligand binding results from (letter), 691
Fluxes, unidirectional, and blood flow, 987
Flying ants with an unexpected equilibrium and an expected ESS, a model of the sex ratio in, 523
Food-webs, model, efficiency of biomass transfer and the stability of, 225
Foraging behaviour of ants: a correction (letter), 275
Formation flight, energy savings through? A re-examination of the vee formation, 41
FORSDYKE, D. R., Are introns in-series error-detecting sequences?, 861
FRITZSCH, G. (see SESHADRI, M. S.), 197

Prey, one, and two predators in a patchy environment: an application of MICMAC modelling, 411
Proline uptake by renal brushborder vesicles: a mathematical analysis, 597
Proofreading, kinetic, optimization of; a general method of derivation of the constraint relations and an exploration of a specific case, 157
Proofreading with zero energy cost, accuracy of, 179
Prostaglandins, biophysical studies on molecular mechanism of abortificient action of; the study of the long and short range interaction between different fragments of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1, 25
Prostaglandins, biophysical studies on molecular mechanism of abortificient action of; the study of molecular electrostatic potential distribution of $PGF_{2\alpha}$, $PGF_{1\beta}$ and PGA_1, 7
Protein structural models for nucleic acid interactions, 609
Protein-ligand binding results from fluorescence polarization data, corrected equations for the calculation of (letter), 691

RAJKOWSKI, K. M. and CITTANOVA, N., Corrected equations for the calculation of protein-ligand binding results from fluorescence polarization data (letter), 691
REINER, J. M., Population distribution of labelled DNA and the effects of cell division, 533
Renal brushborder vesicles, uptake of proline by; a mathematical analysis, 597
RILEY, R. T. (see SHIRAZI, M. A.), 1033
RIPOLL, D., MARCHI, E. and BENEGAS, J., A new approach to microtubule depolymerization, 53
Rotating myosin filament theory of muscular contraction, 667

SAVAGEAU, M. A., Accuracy of proofreading with zero energy cost, 179
SAVAGEAU, M. A. and LAPOINTE, D. S., Optimization of kinetic proofreading: a general method for derivation of the constraint relations and an exploration of a specific case, 157
SCHROEDER, L. A., Consumer growth efficiencies: their limits and relationships to ecological energetics, 805
Seedbank, models of an annual plant population with a, 643
SEGAL, S. (see WEISS, S. D.), 597
Self-fertilization and parthenogenesis, the "survivor effect" and the evolution of, 491
Self-reproducing biochemical networks, deterministic and stochastic solutions and discussion of the approach for populations of; analysis of the selection equations for a multivariable population model, 325
SESHADRI, M. S. and FRITZSCH, G., The time evolution of sequential enzyme reactions: a singular perturbation approach, 197
Set-point: is it a distinct structural entity in biological control?, 387
Sex ratio role in the evolution of eusociality in haplodiploid social insects, 125

Sex ratio in flying ants with an unexpected equilibrium and an expected ESS, a model of, 523
SHERIDAN, J. P. (see MERAJVER, S. D.), 737
SHIRAZI, M. A. and RILEY, R. T., Estimation of molecular diffusivity in isolated animal tissues, 1033
